

Streaming data of select stocks in given industry groups

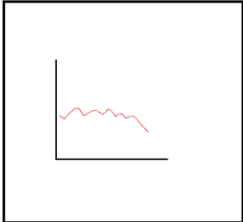

Economic data for given industries

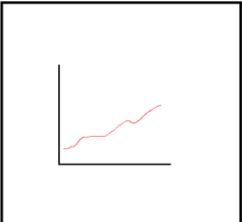

Crypto performance

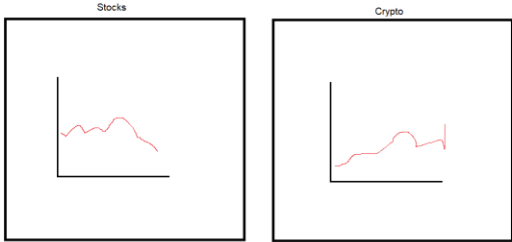

Overall Stock performance

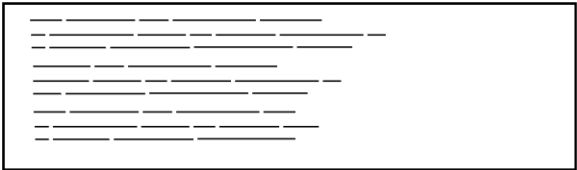

Overall Crypto Performance

Machine Learning Prediction of Performance

Recommendations

Ben Grudt:

- Maybe show economic indicators before streaming data or show them side by side
- Possibly treat crypto as its own industry
- Maybe include a pie chart of different cryptocurrencies

Colin:

- If you're trying to drill down, you should start with more general indicators first, but it depends on how you want to structure your report

Hang:

- Maybe look at how stocks and crypto are affected by events such as the Federal Reserve's change of interest rate
